Data Science Club

Student Club by

**Department of Information and Communication Technology
Faculty of Technology
Marwadi University**

Club Mentor
Prof. Nishith Kotak
(Location: MA157)
nishith.kotak@marwadieducation.edu.in

Vision

Marwadi
University
Marwadi Chandarana Group

To empower students with data-driven problem-solving skills through hands-on learning, enabling them to leverage data science, machine learning, and AI for solving real-world challenges in academia, industry, and society.

Mission

Marwadi
University
Marwadi Chandarana Group

DSM1: To develop students' ability to analyze, interpret, and derive insights from data to solve real-world problems effectively.

DSM2: To provide hands-on experience with data science tools, machine learning models, big data frameworks, and AI technologies through workshops, projects, and hackathons.

DSM3: To educate students on the ethical implications of AI and data science, ensuring responsible and unbiased use of machine learning models.

DSM4: To engage students with industry professionals, researchers, and open-source communities for career and research opportunities.

Club Objective

Marwadi
University
Marwadi Chandarana Group

- To introduce students to Python, R, SQL, and data manipulation libraries like Pandas and NumPy.
- To conduct workshops on machine learning, deep learning, and statistical analysis.
- To train students on data visualization tools like Matplotlib, Seaborn, Power BI, and Tableau.
- To guide students in building end-to-end data science projects, from data collection to model deployment.
- To encourage participation in hackathons, Kaggle competitions, and research-based projects.
- To promote ethics in AI, responsible data handling, and explainable AI concepts.

Club Outcomes

Marwadi
University
Marwadi Chandarana Group

- Improved proficiency in data science tools, algorithms, and statistical methods.
- Higher student participation in data science competitions, research, and open-source projects.
- Increased placement opportunities in AI, Data Science, Business Analytics, and Research roles.
- Development of real-world data science applications, including predictive analytics, NLP, and computer vision projects.
- Stronger collaborations with industry and academia for internships, projects, and mentorship.
- A dynamic learning community that fosters innovation, research, and industry engagement in data-driven technologies.

Club Activities (1/2)

Marwadi
University
Marwadi Chandarana Group

- Learn the voice of data-Data Pre-processing and Data Visualization
- See through different types of data: Numbers, Text, Image, Video, and Audio
- Learning the statistical analysis concepts
- Learning Data Analysis through Microsoft Excel
- Learning to design the live dashboard using the complex data
- Hands-on implementation and statistical inference with Hypothesis testing using R programming
- Implementing the python libraries like Numpy, SkLearn, Pandas, Matplotlib, Keras, Scipy, Seaborn, etc.
- Mining Information through webpages and analysing them
- Integrating SQL with Python for data analysis
- Learning to deal with Big Data and its associate tools
- Learn different ML and Deep Learning Models to play with data

Club Activities (2/2)

- Introduction to Natural Language Processing with hands-on training over real world problem definition
- Introduction to Recommendation Systems with hands-on training over real world problem definition
- Time Series Analysis, Forecasting and Cluster Analysis
- Learning to integrate with GPUs and Parallel Processing the tasks
- Design an AI-enabled solution and deploy in the real-world problems
- Organising Webinars or talks about recent technologies in the field.
- Conducting Hackathons & Contests.

And many more...

NOTE: Atleast 10 activities will be carried out based on the targeted students and their current level of learning of curriculum.

Benefits to the Members

Marwadi
University
Marwadi Chandarana Group

1. Workshops and Hands-On training Sessions
2. Mentoring
3. Hackathon/Competition Supports
4. Interactions with the experts
5. Industry Visits
6. Placement Support to the Members

And many more...

Data Science Club

“From Raw Numbers to Radiant Insights: Cultivate the Magic of Data Science”

Core Committee

MANSIBA GOHIL
Convener

VRAJ PITHWA
Dy. Convener

FENIL VADHER
General Secretary

DIYA KANERIYA
Event Co-ordinator

VRAJ NANDWANA
Tech Lead

HITARTHI P.
Content Manager

Skills to master:

Data Visualization,
Statistical Analysis,
R, Python, SQL Languages,
Data Mining,
AI

Prof. NISHITH KOTAK
Faculty Mentor
