Tableau Competiton

Date: 04-05-2025

Event Report

➤ **About the Competition:**

This individual-based competition challenged each participant to showcase their data analysis and visualization skills using **Tableau**. Competitors were provided with a dataset and asked to create an **interactive dashboard** that effectively communicated key insights through creative and clear visual representations.

Participants were evaluated on:

- Understanding and analysis of data
- Dashboard interactivity and layout
- Visual creativity and clarity
- Overall presentation of insights

The goal was to promote independent thinking and data storytelling among students through hands-on experience.

1. About DS Club:

The session started with an introduction to the Data Science Club (DS Club). Developed by students from the ICT department under the guidance of Professor Nishith Kotak, the club's mission is to explore the vastness of Data Science and Data Visualization. The club focuses on helping its members understand how data can be harnessed for deriving meaningful insights and making informed decisions through the correct analysis of data.

2. Introduction to Data Science:

The term "Data Science" was introduced, highlighting how it integrates multiple disciplines such as statistics, artificial intelligence, machine learning, and programming to derive valuable insights from data. Attendees learned that Data Science helps organizations optimize their operations, understand trends, and make strategic decisions based on data-driven analysis.

3. Participation & Impact:

The competition saw enthusiastic participation from students who demonstrated a keen interest in data analytics. Each individual participant brought a unique approach to the challenge, producing insightful dashboards that reflected both technical skill and creative flair.

The competition served as:

- A learning experience for using Tableau effectively
- A platform to apply theoretical knowledge to practical problems
- An opportunity to enhance individual problem-solving and visualization capabilities

Top-performing participants were awarded certificates, and the best dashboards will be featured on the department's digital platforms.

4. Conclusion:

The Tableau Competition was a great success, serving as a platform for students to enhance their analytical thinking and technical skills. It instilled the importance of data visualization in today's world and strengthened the foundation of the student community in data science tools and techniques
